Building-Blocks of Biology

The classic view of molecular biology saw RNA as a mediator between DNA and proteins. This role has not changed, but RNA turns out to play many others – Prof. Paweł Golik says

The Wolf Cries ‘Wolf’

“Wolves have always been unlucky,” Dr. Robert W. Mysłajek writes. To really learn about them, one needs to “don a pair of boots and a waterproof coat and just head outdoors”

Briefly Speaking

The Logic of Social Structure

Poland’s intelligentsia and specialists have begun to focus more on being professionals, on educating themselves, to earn more and demonstrate they are people of success – Prof. Henryk Domański tells us
