

ACADEMIA

No. 2 (22) 2009 The Magazine of the Polish Academy of Sciences

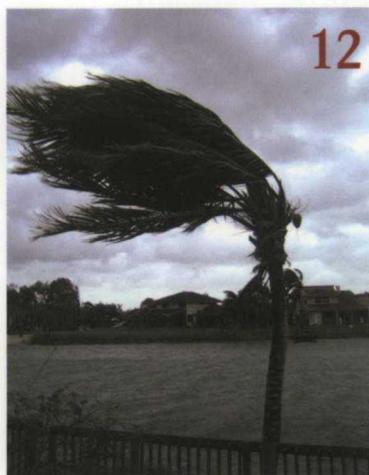

Focus on

Machine Learning & Biology

J. Koronacki, J. Komorowski

With today's technologies, the human genome can be sequenced in a week. We have entered an age of the life sciences

Focus on

Warmer or Cooler?

L. Marks

Until recently, the climate seemed stable. Research now shows cyclical changes to have been occurring for millions of years

Briefly Speaking

Leaving Tracks Uncovered

J. Tokarska-Bakir, A. Zawadzka

The strength of social structure is that everyone – including those discriminated – recognize it as the only possible one

Editorial 3

Focus on

Linguistics 4

A Corpus of Polish, Rafal L. Górski, Adam Przepiórkowski, Barbara Lewandowska-Tomaszczyk, Marek Łaziński

Microbial Biochemistry 8

Perfect Inheritance, Michał Dmowski

Paleogeology and Climate 12

Warmer or Cooler?, Leszek Marks

Science and the Economy 16

Science, Stupid!, Jerzy Duszyński

Art History 20

For the King's Glory, Stanisław Mossakowski

Futures Studies 24

Forecasting the Future, Tadeusz Baczek

Bioinformatics 28

Machine Learning & Biology, Jacek Koronacki, Jan Komorowski

Research in Progress 32

Bioinformatics 32

Genes in 3D, Teresa Szczepińska

Paleobiology 34

Dawn of the Dinosaurs, Tomasz Sulej, Grzegorz Niedźwiedzki

Literary Theory 36

Three Types of Narrative, Jacek Leociak

Astronomy 38

Distant Systems, Krzysztof Ziolkowski

Agricultural Sciences 40

The Landscape's Contribution, Janusz Jankowiak

Briefly Speaking 42

Leaving Tracks Uncovered 42

Highlights 46

Insight 48

From Bacteria to Lucy 48

Marcin Machalski

Short Circuit 50

Ten Commandments 50

Włodzimierz Zawadzki
